Visa status: Canadian citizen, permanent EU work permit

Summary

Applied social scientist with **strong statistical and programming background** seeking an position that will allow me to combine my **passion for writing** with my **expertise in human behaviour**.

Relevant experience and core skills

Interdisciplinary and cross-cultural competence	Over 10 years of interdisciplinary research experience in academia and in the non-profit sector. My experience collaborating with local communities and Indigenous organizations has honed my ability to distill the essential elements of complex research methods and findings for non-technical audiences and to draw on stakeholder needs/concerns to motivate project design.
Outstanding written communicator	Over 30 scientific articles (>15 as first- or senior-author) spanning anthropology, sustainability science, public health, and psychology, including in top journals such as PNAS, Nature Human Behaviour, and Nature Climate Change. I have also produced climate change policy reports for Indigenous organizations in Canada.
Advanced quantitative and qualitative research skills	Proficient in statistical computing including Bayesian and frequentist approaches, econometric and social network modeling, and machine learning methods (using R, stan, python). Proficient in LaTeX, Overleaf, BibTeX, and Git. Working knowledge of programming, databases, CI/CD workflows, web technologies (HTML, CSS). Experienced in qualitative methods including text analysis, grounded theory and graph-based causal inference techniques.
Experienced people manager	I have been leading a growing research team for the past 6 years, which has included hiring and training research assistants, graduate students, and postdocs, co-developing research projects, and supporting team members' wellbeing and career growth.

Education

2016	Data Science Bootcamp	The Data Incubator (San Francisco, USA)
2010–2016	Ph.D. Anthropology	Stanford University (Stanford, USA)
2008–2010	M.A. Anthropology	Trent University (Peterborough, Canada)
2004–2008	B.A. Honors Anthropology	University of Alberta (Edmonton, Canada)

Work experience

Environmental Social Science Consultant | 2021 - present | Freelance

- Design and completion of interdisciplinary applied research projects, including regional-scale econometric analyses
- Drafted evidence-based climate change policy recommendations
- Designed and conducted stakeholder consultations and focus groups
- Provided logistical support to an interdisciplinary scientific team

Senior Researcher | 2019 - present | Max Planck Institute for Evolutionary Anthropology

- Lead investigator of the Sanguatsiniq research project, responsible for a team of 5 researchers
- Responsible for research design, community consultations, writing grant applications, budgeting, field logistics, data collection, data analysis, writing scientific publications and community reports, training and leading local teams of research assistants
- Advising and mentoring of junior team members, taught skills workshops and courses for graduate students

Postdoctoral Research Associate | 2017 - 2018 | University of Nebraska-Lincoln

- Conducted quantitative and qualitative research in public health sociology
- Taught workshops in statistics and network analysis for undergraduate and graduate students in anthropology and public health

Postdoctoral Scholar | 2016 - 2017 | Stanford University

- Led a research project on the resilience of Arctic food systems to climate change
- Taught three interdisciplinary undergraduate courses in environmental social science and human biology

Copyeditor | 2009 - 2020 | Freelance

- Editing technical/scientific works for English second-language authors, for example: a medical case report and an archaeology book manuscript

Languages

English (First language); **French** (Professional proficiency); **German** (Fluent, self-assessment CERF level C1)
